

Moulsford Climate Action Plan & Sustainability Policy

Reviewed: January 2026

Reviewed by: C Symonds

In 2015, the UN Sustainable Development Goals were designed in order to begin to achieve a more sustainable world, where the protection of the environment and reversal of climate change was at its core. In order to satisfy these goals, Moulsford Preparatory School recognises that it has a responsibility to actively reduce the negative impacts that the daily running of the School has on the environment.

Moulsford will integrate and address environmental sustainability in the four key areas set out by the DfE paper: *Sustainability and Climate Change: A Strategy for the Education and Children’s Services Systems*. These are designed to help schools reduce their environmental impact, build resilience, engage students, and create a greener learning environment.

Moulsford strives to become a leader in environmental sustainability and will inspire other schools to follow suit. The School realises that the aims of this policy will take a number of years to achieve and this is a long-term plan, but recognises the importance of acting now.

In order to achieve the aims set out in this policy, Moulford will have a designated Sustainability Governor and a member of the Senior Leadership Team (SLT) who will head up the Sustainability / Eco Committee. The SLT member will review this policy annually in order to keep these aims up-to-date and report back to the Governor, ensure that the actions set out in this policy are being taken, and that the predicted impacts are being attained. They will also update this policy if the School believes further aims or actions are needed, and will inform the School community when aims are satisfied.

Climate Change poses an enormous challenge for the future of the planet. Schools play a crucial role in providing pupils and staff with sustainable values and the knowledge that is needed to make more environmentally-aware decisions.

Starting with this policy, Moulford's goal is to instil in both staff and pupils a desire to help protect the planet. While the aim for the School is to be Carbon Neutral by 2030, we hope that in providing this education, pupils and staff will take what they have learnt, and incorporate it throughout their personal and professional lives, so that they may motivate others to do the same.

This policy works in conjunction with the Moulford Climate Action Plan.
